Node.js

MongoDB

SQL

PostgreSQL

Linters And Webpack

## Summary

Full Stack Developer with a solid understanding of modern web development and a strong foundation in the MERN stack. Possess a problem-solving mindset and a commitment to continuous learning, with a proven ability to adapt and grow in dynamic environments.

## Education

July,2017  
- August 2020

Bachelor's in Political Science

Delhi University , Delhi

2015  
- 2016

Higher secondary

Ganesh Shankar Vidyalaya , Delhi

## Projects

### • Crypto-Dashboard

A cryptocurrency dashboard that provides real-time data along with historical insights ranging from one day to one year. Users have the ability to search for specific currencies and examine their market capitalization values. Developed using React, this dashboard is styled with Bootstrap and custom CSS, and it has been deployed on Netlify. It integrates the CoinGecko API to deliver precise and current information, providing a user-friendly interface for monitoring and analyzing trends in the cryptocurrency market.

### • Weather App

A weather application that retrieves current weather conditions and forecasts for chosen cities by utilizing the AccuWeather API. Developed with React for a dynamic and responsive user experience, it features custom CSS for styling. The app also incorporates a search functionality that allows for effortless city searches, delivering current weather data and forecasts.

### • Blog Post

This blogging application enables users to leave comments on posts while providing administrative functions to publish new entries and remove comments. It employs MongoDB for data storage, and leverages Node.js and Express for the backend services, along with React for a dynamic and responsive user interface. This configuration guarantees smooth content management and user engagement.

### • Inventory App

An inventory management system that allows users to view and modify inventory items. EJS was employed to render dynamic lists of inventory, while MongoDB serves as the data storage solution, complemented by Node.js and Express for backend operations. This configuration facilitates effective inventory tracking and provides real-time updates.

## Certifications

- Foundation Certificate in JavaScript,React, Node from Almabetter.
- Certificate in DSA, Javascript from Almabetter.
